

MICHELLE TAYLOR, THE ROOTED BEGONIA

Jewelry Care

Michelle Taylor uses glass imported from Italy, and all findings (clasps, earring wires, etc.) are sterling silver. Any pendant wires used are sterling silver covered copper. All spacer beads are semi precious. Every glass bead is hand-sculpted in a flame with an oxygen propane torch, so each bead is one of a kind.

For cleaning, it's recommended to gently rub the sterling silver parts of the jewelry with a cleaning cloth.

*Sterling Silver jewelry should be kept in ziplock bags when not being worn.
